## **Questionnaire**

### ***International Vaccine Solidarity***

Coping with the Covid 19 pandemic requires difficult decisions. By the end of September, about 64% of people eligible for vaccination had been vaccinated at least once. What do you think is the more important priority now for the use of Germany's vaccine stocks: offering a third vaccine dose ("booster vaccination") to people in Germany or giving vaccine stocks for first and second vaccine doses to less developed countries?

<1> Third vaccination dose ("booster vaccination") for people in Germany.

<2> Giving vaccine stocks for first and second vaccine doses to less developed countries.
